

WatchGuard XTM Bundled Solutions

For WatchGuard® XTM 2 Series, 5 Series, 8 Series, and 10 Series appliances

WatchGuard® makes it easy and affordable for businesses to get complete threat management and productivity safeguards in one convenient package. An exceptional value, each package includes:

- Application Layer Firewall/ VPN
- Integrated SSL VPN

Plus subscriptions for:

- Application Control
- Web reputation service
- Spam blocking
- URL filtering
- Anti-virus protection
- Intrusion prevention
- Support & maintenance

Bundle everything you need for **robust, multi-layered security in one convenient package** with support and maintenance included.

One package, one license, one great price.

LET THE BUNDLE SIMPLIFY YOUR LIFE

From initial purchase and setup through ongoing security management, the XTM Security Bundle makes network security management easier and more efficient. Getting everything you need in one package means:

- No need to handle multiple POs, multiple policies, multiple configurations, or work with multiple vendors
- One license key turns on the firewall and all security subscriptions
- One support contract covers all aspects of your network security profile

INSIDE THE XTM SECURITY BUNDLE

The XTM Security Bundle includes:

- **XTM Security Appliance**
Your choice of any WatchGuard® XTM 2 Series, 5 Series, 8 Series, or 10 Series appliance. Find the model that's right for you by visiting www.watchguard.com/compare.
- **Reputation Enabled Defense**
Delivers a powerful cloud-based URL reputation service that protects web users from malicious web pages, while dramatically improving web throughput. Savings in web processing overhead of 30% to 50% are common.
- **Application Control**
Enables IT administrators to exercise fine-grained control over more than 1,500 web 2.0 and business applications, to keep unproductive, inappropriate, and dangerous applications off-limits. Acceptable use policies can be established for users and groups by category, application, and application sub-function for maximum flexibility.
- **spamBlocker**
Blocks unwanted email with near 100% accuracy along with the viral payloads that spam often carries. spamBlocker recognizes spam regardless of the language, format, or content of the message – even image-based spam that other anti-spam products often miss.
- **WebBlocker**
Stops access to dangerous and inappropriate web content in the workplace to increase employee productivity, reduce legal liability, conserve network bandwidth, and block network security risks. Blocks on HTTP and HTTPS, closing the loophole that allows users to bypass network security measures.
- **Gateway AntiVirus**
Provides powerful signature-based protection at the gateway from known viruses, trojans, worms, spyware, and rogueware. Dynamic heuristic analysis uses code emulation to identify polymorphic viruses and dangerous code that signatures can't catch.
- **Intrusion Prevention**
Blocks attacks that comply with standard protocols but carry malicious content, including spyware, buffer overflows, and SQL injections. Scans all protocols and ports to block network, application, and protocol-based attacks.
- **LiveSecurity® Service**
Provides 24/7 technical support* with targeted four-hour response time, hardware warranty with advance hardware replacement, software updates to keep code up to date, and security threat alerts.

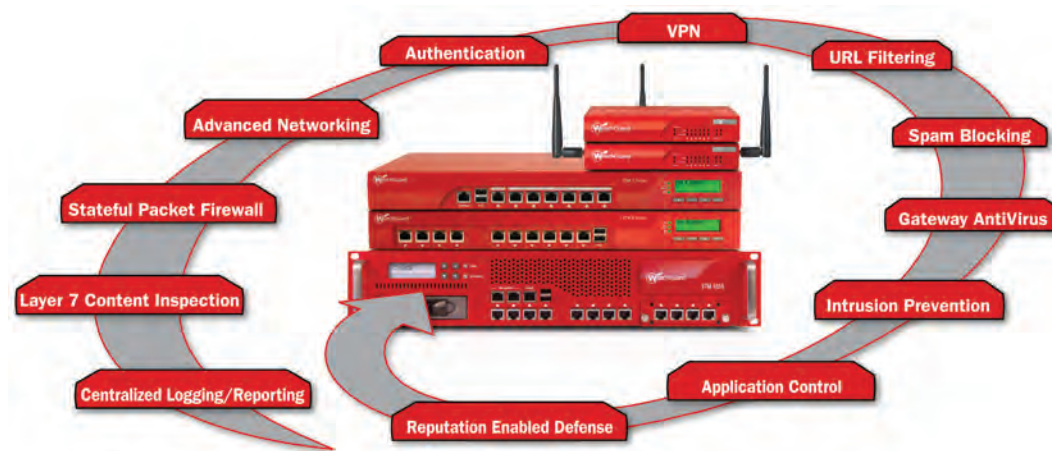

Purchase one Bundle and get the works. That's it – no additional licenses, fees, support contracts, or hardware purchases. It's the easiest way to have powerful extensible threat management protecting your network from malicious threats, and at a very affordable price.

XTM Security Bundles are available in 1-year, 2-year, and 3-year subscription packages.

Call your authorized WatchGuard reseller today for more information or visit www.watchguard.com/bundle.

Fully Integrated Security for Comprehensive Protection

All-in-One Security Solution

WatchGuard XTM appliances combine with powerful security service subscriptions to offer comprehensive protection from malware.

Because the threat landscape is always changing, WatchGuard XTM solutions are designed to be able to easily add new network defense capabilities through security subscriptions, so costly hardware upgrades are not necessary.

Managing Security Subscriptions Is Easy

All security functionality on your WatchGuard XTM solution, including your security subscriptions, can be managed from a single intuitive console for maximum efficiency and ease of use.

- Any security activity identified by a service is logged and stored for easy reporting so you can take immediate preventive or corrective action.
- Administrators have a suite of management tools for granular control and flexibility. In addition to the centralized console, security can be managed from a scriptable command line interface or web UI.
- All management tools, including rich reporting and monitoring, are included with your WatchGuard appliance purchase. There is no additional hardware or software to buy.

Trade in your old security appliance for an XTM Security Bundle and get even more savings!

Contact your authorized WatchGuard reseller for details.

Got the box? Get the Software Suite.

If you already have a WatchGuard XTM appliance, turn it into a complete threat management solution with the Security Software Suite. The Suite includes subscriptions to:

- Reputation Enabled Defense
- Application Control
- WebBlocker
- spamBlocker
- Gateway AntiVirus
- Intrusion Prevention Service
- LiveSecurity® Service for 24/7* technical support, hardware warranty, software updates, and threat alerts

One-year, two-year, and three-year subscription packages are available for the Software Suite. (Suite does not include appliance.)

*Technical support hours per day/days per week for 2 Series Bundles are 12/5.
